

# THEME CHALLENGE! WEEK 15

## Children's Art Week

### 'The Natural World'

For this challenge we would like you to explore the weird and wonderful natural plants and animals around the world. Things so strange and bizarre they sound like they have come from a Dr Seuss story.

To get your brain juices flowing here are a few links for virtual tours of natural things around the world.

<https://naturalhistory2.si.edu/vt3/NMNH/> - Natural History Museum

<https://www.zsl.org/zsl-london-zoo/virtual-london-zoo-> London Zoo

<https://ngs.org.uk/virtual-garden-visits> - Garden Tours.

Once you have decided what type of natural creations interest you the most, use the internet to research the weird and wonderful.

Do you like:

Animals with tails?

Plants with spikes?

Animals which are now extinct? (No longer exist)

Plants with huge flowers?

Insects with camouflage?

Step 1 -

Think carefully about the creature/plant that you are focussing on. What is special about it? Where does it live? What does it eat?

Step 2 -

How are you going to present your chosen thing as art? Will you paint it? Make a model of it? Sketch it, draw it, wax crayon it? Model it out of recycled materials? We don't mind how you decide to do it, as long as you have fun doing it.

Step 3 -

You can send your challenges your class teachers or to Mrs Sissons

[jsissons@appleton.hull.sch.uk](mailto:jsissons@appleton.hull.sch.uk) as a document or photograph. We will then post some special mentions on the school Twitter feed later in the week.
